Short Stay Summary:

The number of people staying with Hosts increased – from 7 in January to 12. Which is the average for Short Stay guests over the last year.

We are still accommodating more women than men, so it is possible that some men have found accommodation at the WYDAN Nightshelter.

The overall number of nights provided by Hosts increased slightly – from 71 to 82 nights. We continue to try and get people with long-term accommodation needs into longer stay provision as soon as we can (see below)

We were unable to find accommodation 9 times this month. 8 of these nights relate to a single weekend where we could not find places for 3 (2 women and 1 man) of the 7 people (4 women, 3 men) seeking accommodation.

The number of times clients "did not attend" remained steady, with only 7 – Frustratingly 4 of the DNAs were on the same weekend we were unable to find places for 3 people. Accommodation was found and declined on 3 occasions.

In February 2017 the number of Active Hosts almost doubled – from 14 to 25
