Animals – Pictures and Words Sheet

How to use these sheets

These are pictures of 1) typical pets in this country, 2) farm animals common in this country and others, and 3) some of the wild animals we have in the UK.

1) Pets

We're a nation of pet lovers, but in most non-Western countries pet ownership is uncommon.

a) Establish the name of each animal, let student practise several times. Then ask student to describe them: shape, size, colour, feel, noise. Check the names again by asking which they like or don't like, which are small/big etc.

b) Questions for conversation:

- Do people keep pets in your country? Why/why not?
- Do you have these animals in your country? As pets?
- What do you know about pets in the UK?
- Do you have any pets? Would you like to?

2) Farm animals

Many refugees will either have come from a farming background, or have farmers in their family, or have had access to a little land for growing veg.

a) Establish and practise vocabulary as above.

b) Questions for conversation:

- What experience do you have of farming in your country?
- What is farming like in your country?
- Have you ever kept animals or grown vegetables or fruit?
- Have you ever been to the countryside here? Do you know anything about farming here?
- Would you like to be a farmer?

3) Wild animals

We have mostly small, harmless animals in this country, we hunt a few but generally we protect them. It might be very different in other countries.

a) Establish and practise vocabulary as above.

b) Questions for conversation:

- Do you have these animals in your country?
- Which animals do you have?
- Are they dangerous?
- Do people hunt them?
- Are wild animals protected in your country?
